

# EEP: Sustainable Energy Management

## A new approach at energy management

The historical method of energy management was merely a function of energy spend and cost avoidance. In today's economy, the demands for sustainability and energy management far outreach yesterday's limited approach and include a myriad of aspects that are intermingled across your operations. Evolution Energy Partners is a **leader in energy efficiency and renewable energy management**, utilizing a consultative, comprehensive turnkey approach to significantly reduce costs and help our customers achieve their sustainability goals.

As energy markets evolve, new opportunities to create value emerge. These include energy efficiency, renewable energy, local generation, green energy purchasing, contract hedging, and more! Over the past few years, there have been significant changes in the energy markets that materially impact organizations' energy strategies and decision-making processes.

### What caused the change?

The cost of renewable energy is now comparable to the cost of conventional energy

New efficiency technologies related to the Internet of Things and Artificial Intelligence are emerging

Major cities across the US are enacting energy efficiency legislation to lower emissions

Energy efficiency projects can now deliver positive cash flow, quick ROI, and savings up to 30% or more

As a result of the move toward more efficient and sustainable energy needs for our customers, Evolution Energy Partners has developed a unique service offering that expands on our proven areas of energy efficiency, energy risk management, and energy data management. **Sustainable Energy Management** will significantly increase your organization's overall profitability while simultaneously accomplishing your sustainability goals.

# What does Sustainable Energy Management include?

- Energy advisory services
- Energy supply risk management
- Energy supply services for on-site/off-site green/brown supply
- On-site/off-site renewable development projects
- Peak load management and Demand management
- Distributed energy resources (DER)
- Building automation and optimization
- Portfolio-wide energy efficiency projects and energy conservation management
- Integrated data management across the portfolio to include energy data, ESG data and M&V for efficiency
- Environmental, Social and Governance (ESG) data required for reporting
- Employee engagement and training

These services represent the intermingled requirements that support a complete sustainable energy management program. Although the aspects of the program are customizable to an organization's strategy and goals, many of the services are dependent on one another. EEP will walk through each aspect to determine the value proposition for your organization.

---

## How can an organization become efficient, manage energy spend, and meet their sustainability goals and requirements?

Evolution Energy Partners will work with all levels of the organization and define a strategy for your energy efficiency, energy risk management and energy data management. We will drill down and develop a customized program that will:

- ✓ Create a value driven energy supply strategy that includes the near and long term demands of the organization, while recognizing your sustainability goals and risk tolerance.
- ✓ Establish an energy efficiency, cost savings and sustainable energy program across the organization.
- ✓ Define a portfolio-based strategy to decrease energy demand and, where desired, leverage green energy as an offset where increased efficiency may not fully reach your sustainability goals.
- ✓ Capture, manage and analyze all energy data and provide ongoing forward-looking analyses for the energy management across the operation.

Sustainable energy management will carry your organization to the next level of operational excellence for a more efficient future. **Welcome to the new world of energy management!**

**Go green, save green.** For more information Sustainable Energy Management, contact us at [info@evolutionep.com](mailto:info@evolutionep.com) or 1-877-280-4655.
